

FT BLANC SOFT

White, Rosé, Red, Fruit, Cider, Mead
Fermentation tannin for white wine

CHARACTERISTICS

Scott'Tan™ FT Blanc Soft, derived from gall nut, is similar to FT Blanc in application but wines made with it are also characterized by softness and improved mouthfeel. White and rosé wines made with FT Blanc Soft have enhanced texture with a perception of sweetness on the palate. Even relatively small dosages can contribute to minerality in wines. Similar improvements can be seen in fruit and mead wines.

RECOMMENDED DOSAGE

White/Rosé Juice	50-150 ppm	5-15 g/hL
White/Rosé Wine*	50-300 ppm	5-30 g/hL
Red Wine	50-300 ppm	5-30 g/hL
Fruit, Cider, Mead	50-200 ppm	5-20 g.hL

**A small addition (2.5-5.0 g/hL) may help mask the perception of bitterness in a finished wine.*

DIRECTIONS FOR USE

Add FT Blanc Soft directly on the grapes at the crusher. It can also be added to the juice or wine during a tank mixing. Good homogenization is important. If the addition is post-fermentation, we recommend waiting 3-6 weeks after the addition before proceeding with normal rackings, fining or bottling.

BENCH TRIAL PREPARATION

Prepare a 2.5% solution of FT Blanc Soft by mixing 2.5 g of FT Blanc Soft with 80 mL of deionized water in a 100 mL graduated cylinder. Once combined bring the volume up to 100 mL.

Bench Trial Recommendations (per 375ml bottle). Allow a minimum of 24 hours before tasting.

Target Addition	mL's of 2.5% Lab Dilution
5 g/hL	0.75
10 g/hL	1.50
15 g/hL	2.25
20 g/hL	3.00
30 g/hL	4.50

PACKAGING and STORAGE

Dated expiration. Unopened the shelf life is 5 years at 18°C. Once opened keep tightly sealed and dry.
